Fair Trade Organic Mexico Chiapas

From Soconusco, Chiapas, Mexico

The Soconusco region of Chiapas is known for being the most productive region of Mexico when it comes to cultivating coffee - much of this is prevalent throughout the region, providing natural shade for the coffee trees. This Fair-Trade Organic Mexican coffee is truly a quality cup that not only protects the environment but also one where a partnership has grown between the mill and the growers, helping to create a sustainable farm-to-cup chain for all. The mountainous highlands of Chiapas provide an ideal climate in terms of temperature and humidity for arabica cultivation.
